An Arbitrage Guide to Financial Markets

Robert Dubil

John Wiley & Sons, Ltd

Contents

1	The Purpose and Structure of Financial Markets	1
1.1	Overview	1
1.2	Risk sharing	2
1.3	The structure of financial markets	8
1.4	Arbitrage: Pure vs. relative value	12
1.5	Financial institutions: Asset transformers and broker-dealers	16
1.6	Primary and secondary markets	18
1.7	Market players: Hedgers vs. speculators	20
1.8	Preview of the book	22
Part One	SPOT	25
2	Financial Math I—Spot	27
2.1	Interest-rate basics	28
	Present value	28
	Compounding	29
	Day-count conventions	30
	Rates vs. yields	31
2.2	Zero, coupon and amortizing rates	32
	Zero-coupon rates	32
	Coupon rates	33
	Yield to maturity	35
	Amortizing rates	38
	Floating-rate bonds	39
2.3	The term structure of interest rates	40
	Discounting coupon cash flows with zero rates	42
	Constructing the zero curve by bootstrapping	44
2.4	Interest-rate risk	49
	Duration	51
	Portfolio duration	56

	Convexity	57
	Other risk measures	58
2.5	Equity markets math	58
	A dividend discount model	60
	Beware of P/E ratios	63
2.6	Currency markets	64
3	Fixed Income Securities	67
3.1	Money markets	67
	U.S. Treasury bills	68
	Federal agency discount notes	69
	Short-term munis	69
	Fed Funds (U.S.) and bank overnight refinancing (Europe)	70
	Repos (RPs)	71
	Eurodollars and Eurocurrencies	72
	Negotiable CDs	74
	Bankers' acceptances (BAs)	74
	Commercial paper (CP)	74
3.2	Capital markets: Bonds	79
	U.S. government and agency bonds	83
	Government bonds in Europe and Asia	86
	Corporates	87
	Munis	88
3.3	Interest-rate swaps	90
3.4	Mortgage securities	94
3.5	Asset-backed securities	96
4	Equities, Currencies, and Commodities	101
4.1	Equity markets	101
	Secondary markets for individual equities in the U.S.	102
	Secondary markets for individual equities in Europe and Asia	103
	Depositary receipts and cross-listing	104
	Stock market trading mechanics	105
	Stock indexes	106
	Exchange-traded funds (ETFs)	107
	Custom baskets	107
	The role of secondary equity markets in the economy	108
4.2	Currency markets	109
4.3	Commodity markets	111
5	Spot Relative Value Trades	113
5.1	Fixed-income strategies	113
	Zero-coupon stripping and coupon replication	113
	Duration-matched trades	116
	Example: Bullet barbell	116
	Example: Twos vs. tens	117

	Negative convexity in mortgages	118
	Spread strategies in corporate bonds	121
	Example: Corporate spread widening/narrowing trade	121
	Example: Corporate yield curve trades	123
	Example: Relative spread trade for high and low grades	124
5.2	Equity portfolio strategies	125
	Example: A non-diversified portfolio and benchmarking	126
	Example: Sector plays	128
5.3	Spot currency arbitrage	129
5.4	Commodity basis trades	131

Part Two FORWARDS 133

6	Financial Math II—Futures and Forwards	135
6.1	Commodity futures mechanics	138
6.2	Interest-rate futures and forwards	141
	Overview	141
	Eurocurrency deposits	142
	Eurodollar futures	142
	Certainty equivalence of ED futures	146
	Forward-rate agreements (FRAs)	147
	Certainty equivalence of FRAs	149
6.3	Stock index futures	149
	Locking in a forward price of the index	150
	Fair value of futures	150
	Fair value with dividends	152
	Single stock futures	153
6.4	Currency forwards and futures	154
	Fair value of currency forwards	155
	Covered interest-rate parity	156
	Currency futures	158
6.5	Convenience assets backwardation and contango	159
6.6	Commodity futures	161
6.7	Spot Forward arbitrage in interest rates	162
	Synthetic LIBOR forwards	163
	Synthetic zeros	164
	Floating-rate bonds	165
	Synthetic equivalence guaranteed by arbitrage	166
6.8	Constructing the zero curve from forwards	167
6.9	Recovering forwards from the yield curve	170
	The valuation of a floating-rate bond	171
	Including repo rates in computing forwards	171
6.10	Energy forwards and futures	173

7	Spot-Forward Arbitrage	175
7.1	Currency arbitrage	176
7.2	Stock index arbitrage and program trading	182
7.3	Bond futures arbitrage	187
7.4	Spot Forward arbitrage in fixed-income markets	189
	Zero Forward trades	189
	Coupon Forward trades	191
7.5	Dynamic hedging with a Euro strip	193
7.6	Dynamic duration hedge	197
8	Swap Markets	199
8.1	Swap-driven finance	199
	Fixed-for-fixed currency swap	200
	Fixed-for-floating interest-rate swap	203
	Off-market swaps	205
8.2	The anatomy of swaps as packages of forwards	207
	Fixed-for-fixed currency swap	208
	Fixed-for-floating interest-rate swap	209
	Other swaps	210
	Swap book running	210
8.3	The pricing and hedging of swaps	211
8.4	Swap spread risk	217
8.5	Structured finance	218
	Inverse floater	219
	Leveraged inverse floater	220
	Capped floater	221
	Callable	221
	Range	222
	Index principal swap	222
8.6	Equity swaps	223
8.7	Commodity and other swaps	224
8.8	Swap market statistics	225
Part Three	OPTIONS	231
9	Financial Math III—Options	233
9.1	Call and put payoffs at expiry	235
9.2	Composite payoffs at expiry	236
	Straddles and strangles	236
	Spreads and combinations	237
	Binary options	240
9.3	Option values prior to expiry	240
9.4	Options, forwards and risk-sharing	241
9.5	Currency options	242
9.6	Options on non-price variables	243

9.7	Binomial options pricing	244
	One-step examples	244
	A multi-step example	251
	Black Scholes	256
	Dividends	257
9.8	Residual risk of options: Volatility	258
	Implied volatility	260
	Volatility smiles and skews	261
9.9	Interest-rate options, caps, and floors	264
	Options on bond prices	265
	Caps and floors	265
	Relationship to FRAs and swaps	267
	An application	268
9.10	Swaptions	269
	Options to cancel	270
	Relationship to forward swaps	270
9.11	Exotic options	272
	Periodic caps	272
	Constant maturity options (CMT or CMS)	273
	Digitals and ranges	273
	Quantos	274
10	Option Arbitrage	275
10.1	Cash-and-carry static arbitrage	275
	Borrowing against the box	275
	Index arbitrage with options	277
	Warrant arbitrage	278
10.2	Running an option book: Volatility arbitrage	279
	Hedging with options on the same underlying	279
	Volatility skew	282
	Options with different maturities	284
10.3	Portfolios of options on different underlyings	284
	Index volatility vs. individual stocks	285
	Interest-rate caps and floors	286
	Caps and swaptions	287
	Explicit correlation bets	288
10.4	Options spanning asset classes	289
	Convertible bonds	289
	Quantos and dual-currency bonds with fixed conversion rates	290
	Dual-currency callable bonds	291
10.5	Option-adjusted spread (OAS)	291
10.6	Insurance	292
	Long-dated commodity options	293
	Options on energy prices	294
	Options on economic variables	294
	A final word	294

Appendix	CREDIT RISK	295
11	Default Risk (Financial Math IV) and Credit Derivatives	297
11.1	A constant default probability model	298
11.2	A credit migration model	300
11.3	Alternative models	301
11.4	Credit exposure calculations for derivatives	302
11.5	Credit derivatives	305
	Basics	306
	Credit default swap	306
	Total-rate-of-return swap	307
	Credit-linked note	308
	Credit spread options	308
11.6	Implicit credit arbitrage plays	310
	Credit arbitrage with swaps	310
	Callable bonds	310
11.7	Corporate bond trading	310
Index		313
