# Contents

## CONTENTS

Preface .....	1
<b>Part I. Interest rates and foreign exchange</b>	
<hr/>	
Chapter 1: <i>Compounding and discounting</i> .....	7
1.1 Notation and definitions .....	8
1.2 Time value of money .....	8
1.3 Simple interest, bills and other money market securities .....	10
1.4 Compound interest .....	16
1.5 Linear interpolation .....	19
1.6 Real interest rates .....	20
Chapter 2: <i>The valuation of cash flows</i> .....	31
2.1 Notation and definitions .....	32
2.2 Cash flow representation .....	34
2.3 Valuing annuities .....	36
2.4 Quotation of interest rates .....	39
2.5 Continuous time compounding and discounting .....	44
2.6 Fixed interest securities .....	47
2.7 Duration and value sensitivity .....	57
2.8 Interest rate futures .....	61
Chapter 3: <i>Zero's, forwards, and the term structure</i> .....	73
3.1 Notation and definitions .....	74
3.2 A brief mystery of time .....	75
3.3 Zero coupon rates .....	76
3.4 Implied forward rates .....	79
3.5 Forwards, futures and no-arbitrage .....	81
3.6 Computing zeros and forwards .....	86
3.7 Algorithm: computing zeros and forwards from swap data .....	89
3.8 Concluding remarks .....	97

Chapter 4: <i>FX Spot and forwards</i>	103
4.1 Notation and definitions .....	104
4.2 Spot exchange rate quotations .....	105
4.3 Inversions .....	108
4.4 Cross rates .....	109
4.5 Money market forward rates .....	114
 Part II. Doing it the Excel® way	
Chapter 5: <i>Learning by doing: an introduction to financial spreadsheets</i>	127
5.1 Step-by-step bond valuation example .....	128
5.2 Do-it-yourself fixed interest workshop .....	137
 Part III. Statistical analysis and probability processes	
Chapter 6: <i>Statistics without becoming one</i>	151
6.1 Notation and definitions .....	152
6.2 Introduction to data .....	153
6.3 Downloading data .....	154
6.4 Data exploration .....	156
6.5 Summary measures .....	159
6.6 Distribution function and densities .....	164
6.7 Sampling distributions and hypothesis testing .....	168
Chapter 7: <i>Regression and financial modeling</i>	175
7.1 Notation and definitions .....	176
7.2 Bivariate data exploration .....	177
7.3 Regression statistics .....	182
7.4 More regression theory: goodness of fit .....	187
7.5 The CAPM beta .....	189
7.6 Regression extensions: multiple regression .....	196

Chapter 8: <i>Introduction to stochastic processes</i>	<b>203</b>
8.1 Notation and definitions .....	204
8.2 Expectations .....	205
8.3 Hedging .....	206
8.4 Random walks and Ito processes .....	213
8.5 How Ito processes are used .....	217
8.6 Volatility models .....	223
8.7 Other time series buzzwords .....	226
 Part IV. Many variables	
<hr/>	
Chapter 9: <i>Many variables</i>	<b>235</b>
9.1 Vectors and matrices .....	236
9.2 Matrix inverses and equation solving .....	240
9.3 Statistics with matrices .....	243
9.4 Portfolio theory with matrices .....	245
9.5 Practicum .....	248
 Part V. Appendix	
<hr/>	
<i>General Mathematical review</i>	<b>264</b>
A1 Order of operations .....	264
A2 Multiplication and division with signed numbers .....	265
A3 Powers and indices .....	267
A4 Logarithms .....	272
A5 Calculus .....	273
